

# FERAL KIZZY

"Slick Little Girl", the first full length album from Long Beach CA's Feral Kizzy expands the hardedged new wave sound of their previous selftitled EP (2013) into epic dark pop. At once catchy and haunting, it captures the intensity of their live shows, while focusing the energy directly into the listener's ears and soul.

The five members of Feral Kizzy bring a variety of influences to their music, from Patti Smith punk to garage, grunge or classic rock, but blend them into a seamless, unique sound. There are hints of Concrete Blonde, the B-52's, the Yeah Yeah Yeahs, glam Bowie and Disintegration-era Cure, but the end result is purely their own.

## REVIEWS

"Feral Kizzy exude a kind of cool that's both approachable and intimidating, complemented with an enthusiasm that can easily make them the unquestioned leaders of the music pack. The fire and skill they bring to the stage will melt down your mind and build something better from the goo that remains, and afterwards I promise you will never be the same." - Music in Press

"The album is a thrilling adventure; one bred across the years in many ways but solely of the now, and Feral Kizzy a band surely looking at big things ahead." - The RingMaster Review

"From time to time music reaches my ears I find myself enraptured by and inevitably, as you know, that is likely to be anything I genre define as new-wave and Feral Kizzy produce music that makes my heart pulse harder with absolute pleasure." - Emerging Indie Bands

"Kizzy Kirk is a rock star, plain and simple. She is unbridled, unpredictable, and her energy is contagious as she writhes across the monitors, strikes Ziggy Stardust poses, and charges through the crowd with mic-in-hand belting out her poetic verses. Kizzy Kirk is Patti Smith, Janis Joplin and Joan Jett rolled into one seductive, hot mess... This unique combination of good and evil is an exhilarating balancing act that keeps the listener on their toes as Feral Kizzy is raw and aggressive while still remaining fun and danceable... Like the cherry on top of the already burgeoning Long Beach local music sundae, Feral Kizzy is a garage/femme/funk/thrash blast for the ears and eyes and should not be missed." - Love/Hate Magazine
